

“LAVARULLI” DETERGENT

Code 710/08

CHARACTERISTICS	“LAVARULLI”, 710/08, is a detergent solution used for common washing of flexographic machine printing with water-based inks. It resolubilizes easily the ink, if the incrustation is not old: in this case the use of stronger detergents is suggested.
INSTRUCTIONS FOR USE	After taken away the ink from the printing machine inkwell and washed it with water, put the “LAVARULLI” detergent in the inkwell (pure or diluted with water in a ratio 1:1) and spread it on the rollers, by using a sponge or a paintbrush. Let the detergent act for a few minutes, then rinse out with abundant quantity of water. For cliché washing, dilute the product copiously with water and spray it on the dirty part directly.
SECURITY DEVICES	The use of rubber gloves and protective glasses during application is always recommended. In case of skin contact with the product, wash with abundant water; don't keep on wearing clothes contaminated by this product.
TECHNICAL NOTES	Aspect: Pink solution pH: alkaline
EXPIRY DATE AND STORAGE	The quality of the product is ensured for 12 months from the manufacture date with the product kept in the original sealed containers. A storage temperature superior than 0°C is suggested.
STANDARD PACKAGING	Tanks 5, 10 and 20 lt.

The aim of these technical data sheets is to inform the customers about our products, but they can not include all printing situations. For this reason the particularities of all printing processes must be considered before use of the described products and we suggest to contact us for further informations.
